RIOT LESSON 8: PROBLEM-SOLVING AND RECAP

LEARNING INTENTIONS	SUCCESS CRITERIA
Students will: • Learn the steps to problem-solving. • Revise key concepts from the lessons. • Create a plan for building my resilience at school.	**Students will be able to:** • Be able to demonstrate the steps of problem-solving. • Recognise and explain key concepts of RIOT. • Produce a 'Student plan' for being more resilient at school.

EXERCISE 1 THE STEPS TO PROBLEM-SOLVING

Put the steps to problem-solving in order. Number them 1 to 6.

	Brainstorm solutions.
	Define the problem.
	Evaluate the results.
	Implement the solution.
	Select a solution that best fits your goal and is likely to work.
	Think about what you want: your goal or outcome.

EXERCISE 2 PRACTISE YOUR PROBLEM-SOLVING

Scenario. My friend is angry with me because I didn't meet her at lunch to work on our project, which is due in two days. I planned to go, but I had to help a student who was injured and then forgot to meet her because I was still in the sick bay. When I realised, I rushed to the library, but she had already left. I feel upset because I didn't mean to ignore her and I'm worried about our friendship and the project.

Define the problem

What is the solution?

EXERCISE 3 **REFLECTION**

Three key ideas I have learnt from the RIOT lessons:

What is one action you can take today to improve your mental wellbeing?

Write a message to yourself to remind you how you can be a more resilient person.
